

HELENA

True Deflationary Passive Income Platform

Buy & Hold for rewards on autopilot and participate in the unique utilities to maximize your gains/rewards.

OVERVIEW

Helena V1 by Nemesis Team, which reached over **\$10M market cap** at its peak and achieved significant success at DeFi, is now proud to present you Helena V2. Helena is poised to lead a DeFi revolution with new innovative V2 features that shine Helena's core mechanism. Helena is a rebase protocol based on the Binance Smart Chain that auto-compounds and auto-stakes Helena Tokens in-wallet while providing holders with a daily ROI of 1%. Helena Financial pays Helena holders a proper return of 1,002%, with rebase payouts every 15 minutes.

Helena aims to be purely deflationary with its new V2 features as a means to burn more tokens than mint new ones in the long run. The primary mechanism that creates the deflation on Helena is Impulsive Burning Hole, which burns 1% of every Helena transaction and it's supported and bolstered by many revenue streams created by V2 features and many more to come.

APY: 1,002% | Daily ROI: 1% | Slippage: Buy 13% | Sell 19%

WINGS Multiplier

Holders can wrap their \$HELENA into \$WINGS (Wrapped \$HELENA) to benefit from multi-layered compounding earnings. Wings Multiplier is a unique and innovative feature where you can buy "Multiplier Power" and earn daily 1% more rewards on top of your WINGS index, similar to the compounding protocols. Unlike \$HELENA auto stake rewards, WINGS Multiplier rewards are not minted by contract. Instead, the rewards are provided by the Hellenic Trust Fund Holdings.

LIVE

WINGS Rush

WINGS Rush is a fun and easy game to earn both WINGS and Loyalty Point Tokens simultaneously. LP Tokens are rewarded by participating in the draws. There are four different draws, each differing in entry costs and reward amounts. These draws are named after their respectable prize and entry amounts. Participating in higher tier draws than Bronze grants bonus LP.

Unlock Criteria: Reach "50,000 Global Multiplier Power" on WINGS Multiplier or 1 Month After V2 Release.

LOCKED

Auction Bonding

It's an on-chain auction system in which participants can bid BUSD tokens to win WINGS rewards. The duration of the auction will be extended by 30 minutes each time a new high bid is made. When the countdown reaches zero, the tokens of the top 3 bidders are consumed and the prizes are distributed accordingly.

Unlock Criteria: Mint "100,000 LP Tokens" through WINGS Rush Globally.

LOCKED

Reverse Auction Bonding

This game is Classic Auction Bonding with the same rules applied but different rewards and bidding types. Users can compete to earn BUSD rewards, and the biddings are done with either WINGS, Loyalty Point Tokens, or other platform tokens such as NMS.

Unlock Criteria: Collect "25,000 USD" through the Auction Bonding Fees.

LOCKED

Clubhouse & Loyalty Points

The Clubhouse will be the place to go to enjoy a variety of chance-based games while earning Loyalty Point and WINGS tokens. Loyalty points entitle investors to a share of the LP Pool (Loyalty Point Pool), which pays out daily dividends to shareholders and will be used for future features.

The Clubhouse will provide real value and a revenue stream to Helena, which is essential for a reward-yielding protocol. Having a revenue stream like the clubhouse gives Helena real value, making it deflationary and long-term sustainable.

Unlock Criteria: Burn "25,000 LP Tokens" through the Reverse Auctions.

LOCKED

R.C. Golden Epochs (V2)

Random Consecutive Golden Epochs appear at random, boosting the forthcoming rebase rewards by at least 10% and up to 1000%

Unlock Criteria: Stake 50,000 LP Tokens on Profit-Sharing Pool Globally.

LOCKED

Angel NFT Zone

Angel NFT Zone features Random NFT Boxes that allow you to obtain utility NFTs with different rarities, all of which are uniquely crafted only for Helena. These NFTs can be staked to gain rewards depending on their rarities. All NFTs have the same durability points but different stake powers depending on their rarity levels. Staked NFTs lose their durabilities each epoch passed until they are destroyed, and they won't be generating further income.

Unlock Criteria: Stake 50,000 LP Tokens on Profit-Sharing Pool Globally.
